PROFILE

Pre-final year Computer Science Engineering student at VIT Chennai with a 9+ CGPA and hands-on experience building and deploying full-stack and AI-integrated applications. Strong foundation in Data Structures & Algorithms, object-oriented programming, databases, and backend development, with growing experience in Generative AI and machine learning. Proficient in Java, Python, and JavaScript, with experience developing REST APIs, working with cloud platforms, and deploying end-to-end applications.

EDUCATION

- B. Tech in Computers, VIT Chennai** 2024 – 2028 | Chennai
GPA: 9.13/10 Pre-Final year Btech Student
- 12th CBSE in PCMC, Christ Academy Junior College** 2022 – 2024 | Bengaluru, India
GPA: 95.6%
- 10th ICSE, Christ Academy ICSE School** 2009 – 2022 | India
GPA: 97.4%

PROJECTS

Food Bridge, Food Redistribution System

React.js, Node.js, Express.js, MongoDB

- Designed and implemented **end-to-end RESTful API** system for food listing, request, and claim workflows — owned architecture from schema design through production deployment.
- Engineered **MongoDB schemas** using Mongoose to optimize data retrieval patterns; applied **JWT-based auth** with secure route handling across all protected endpoints.
- Integrated **Cloudinary** for image processing and cloud storage; deployed full system via **Render** and **Netlify** with zero-downtime production configuration.
- Live: [food-bridge](#) 📄 GitHub: [food-bridge-project](#) 📄

World Cup AI Predictor, Machine Learning Match Outcome Prediction

Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook

- Built an end-to-end **ML pipeline** predicting international football match outcomes using historical match data sourced from Kaggle.
- Engineered predictive features including win rate, recent form, goal difference, average goals scored/conceded, and tournament importance.
- Trained and evaluated a **Random Forest Classifier** for multi-class outcome prediction, achieving **55.7% accuracy**; iterated on feature selection to improve over baseline.
- GitHub: [world-cup-ai-predictor](#) 📄

SKILLS

Languages: — Python, Java, C, JavaScript

CS Fundamentals — Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Frontend — React.js, HTML, CSS, Tailwind CSS

Backend & APIs — Node.js, Express.js, FastAPI, REST APIs

AI/ML — NumPy, Pandas, Scikit-learn, Generative AI, Google Gemini API, Embeddings, Semantic Search

Databases & Cloud — MongoDB, Microsoft Azure, Cloudinary, Render, Netlify

Tools — Git, GitHub, MongoDB, Cloudinary, Render, Netlify

ACHIEVEMENTS

Hackathon Winner — CYGNIX

Won **1st place** in the Digital Twin – NLP problem statement by developing an AI-powered smart HVAC optimization system for energy-efficient building management.

CERTIFICATES

- Microsoft Azure Fundamentals AZ-900 📄
